- Airport Hazards
- Flood Insurance
- Coastal Zone Management
- Contamination and Toxic Substances
- Floodplain Management
- Historic Preservation
- Noise Abatement and Control

***DHCD will upload completed ERR into HEROS!**

PROJECT WORK FLOW

Project scenario involving both a general and Lead abatement contractor:

Who begins work first or do contractors work together?

Let's discuss project work sequence.

If Lead requirements are completed before general work, how does the Lead contractor clean for clearance?

Does the Lead contractor wait until all general requirements are met before final cleaning?

BEST CASE SCENERIOS:

**ONE CONTRACTOR WHO ALSO HAS A
LEAD ABATEMENT LICENSE**

**COMPLETE GENERAL WORK BEFORE
LEAD REMEDIATION WORK**

Community College Workforce Alliance John Tyler Community College Chester, VA

Lead Worker: February 18th – 19th

Lead Supervisor: February 22nd – 25th

Lead Inspector and Risk Assessor: March 8th – 12th

Note: classes are provided free of charge for all program providers and their subcontractors, provided requirements are met

Effective Containment: The Key to Passing the Clearance Test

Containment is the method used to protect the environment from further contamination by dust that contains lead. This involves the use of 6mil polyethylene sheeting to cover all exposed areas.

INTERIOR CONTAINMENT

LAYING OUT AND SEALING CONTAINMENT

Interior Containment

Exterior Containment

Cleaning Using HEPA Vacuum
